The Suffolk Statement

Back to where it all began, with a solid oak version of our popular Suffolk Original. Supreme craftsmanship and a celebration of the form and finish of natural A-Grade white oak.

A truly luxury option with unsurpassed sound insulation, and a striking piece to complement any style of decor. The warmth and texture of real wood, and the trust and solidity that goes with it. A door to be celebrated.

Product Description	Internal Suffolk Solid Oak
Features & Benefits	100% Solid Oak Timber Hand selected timbers enhances the natural appearance of the door Engineered construction using 3 layers of real oak: Components are glued, compressed and laminated together. Constructed for strength, this gives greater dimensional stability, minimizing the expansion and contraction that is characteristic of non-engineered wood No Lippings: All edges can be trimmed up to 20mm each XL Joinery V-Groove 6 Vertical Panels Suitable for interior use Ready for Stain or Paint Standard sizes available in 30" and 33" widths Can be hand finished with XL Colours Available Made to Measure with XL Bespoke Service FSC Certified product
Warranty	30 Years Manufacturing Guarantee
Materials	Oak

Rustic Oak

Rustic Oak

The Rustic Oak is a traditional cottage style, perfect for renovations, heritage interiors, and for anyone seeking the cosy warmth of this dependable and timeless classic.

This statement solid oak piece combines the best modern construction methods with a material that stands the test of time, providing a real sense of presence for any interior. And for those looking for flexibility, the engineered core White Primed Cottage represents the easiest way to achieve the kind of finish you need, ready for painting or Colours by XL.

Materials	Softwood core MDF Faces White Primed Finish

Tricoya External Doors

Tricoya External Doors

The technology behind MEDITE TRICOYA EXTREME wood is based on acetylation, a process that has been developed by specialists over decades of research and testing. Acetylation changes elements within the wood, reducing the ability to absorb water and adding stability and durability.

The acetyl, which provides these qualities, is naturally present within the wood. The technique used to create MEDITE TRICOYA EXTREME simply increases the proportion of this vital element.

A high-tech solution, but one with outstanding performance benefits.

Product Description	Tricoya White Primed External Door
Features & Benefits	Solid Engineered External Door using a combination of traditional and modern materials Constructed with exceptionally durable and dimensionally stable Tricoya outer faces ensures these hard-wearing and weather-resistant external doors can withstand all weathers Factory Primed ready for on-site finishing Glazed models are Double Glazed for improved thermal efficiency Can be trimmed up to 12mm from each edge Can be hand finished with XL Colours EUTR Compliant (non-FSC)
Warranty	30 Year Guarantee against Rot and Fungal Decay 10 Years Guarantee against Manufacturing Defects 10 Year Guarantee against Double Glazing Unit Failure 10 Year Guarantee on Factory Painted Finish
